## Professional Profile

I am a dedicated Full-Stack Software Developer based in England, UK, specialising in building and designing web applications with a focus on e-commerce. I aspire to create projects from concept to completion, ensuring functional and aesthetic excellence. I am passionate about coding and driven by the challenge of bringing innovative ideas to life.

## Experience

### Virgin Active UK / Sales & Front of House

March 2022 - April 2023, Solihull, UK

- Acted as the point of contact for members, elevating their experience by addressing enquiries and maintaining high standards of administration and support.
- Created a warm and inviting atmosphere throughout the club, welcoming new members and providing tours.
- Took ownership of membership targets, striving for excellence in sales, retention, and growth each month.
- Tailored membership offerings to meet individual needs and expanded corporate memberships within the local area.
- Provided advice on activities related to Exercise Experience and products offered by Virgin Active.

### Elec Services & Maintenance LTD / Business Administrator

July 2021 - March 2022, Solihull, UK

- Managed and organised all administrative duties for the business, streamlining processes to increase productivity.
- Created a Master Sheet to efficiently track and organise active and completed jobs from various contracts.
- Coordinated schedules and managed the diary for multiple engineers, ensuring seamless daily operations.
- Enhanced communication with property and facility managers, improving service delivery and client satisfaction.
- Played a key role in increasing revenue through improved administrative efficiency.

### One Stop / Sales Assistant

November 2015 - July 2021, Solihull, UK

- Provided excellent customer service by advising and assisting customers.
- Maintained stock levels and ensured the shop floor was clean and organised.
- Managed product information, pricing, and availability, contributing to efficient inventory management.
- Received deliveries and followed company policies and procedures to maintain operational standards.
